Global and Local Partnerships

We collaborate closely with the Iraqi Ministry of Environment, the Directorate of Mine Action (DMA), and the Iraqi Kurdistan Mine Action Agency (IKMAA). Our international and NGO network includes The HALO Trust, DanChurchAid (DCA), HAMAP-Humanitaire, UNEP, the Climate and Clean Air Coalition (CCAC), the Ministries of Foreign Affairs for Denmark (DANIDA) and the Netherlands, and local partners like the Judy Organization for Relief and Development (JORD).

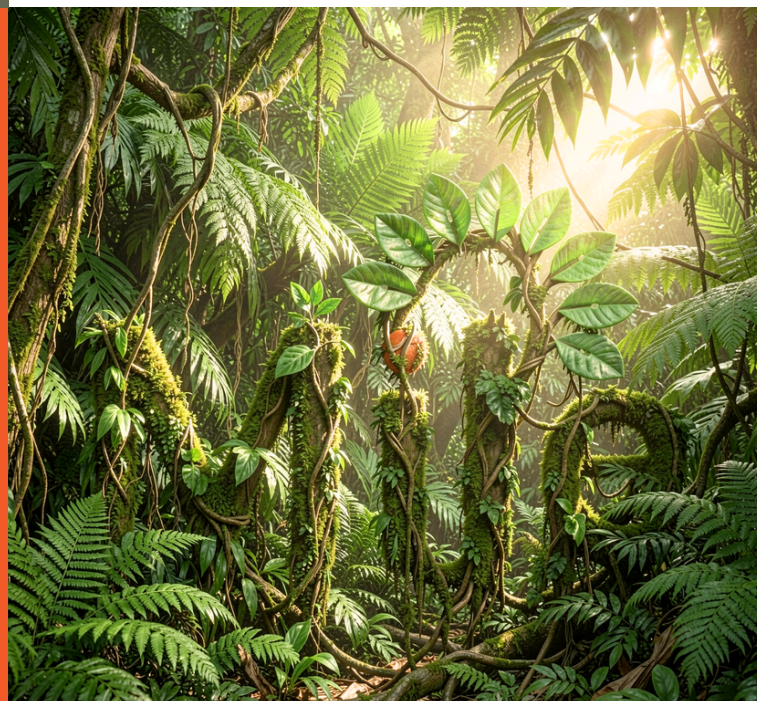
Mile Organization

Safety First, Environment First. Safe land saves lives. Clean land saves nature.

MILE Organization for Environmental Protection

Our Mission & Vision

Established in June 2022, MILE is a registered national non-governmental organization headquartered in Erbil and Baghdad. Our mission is to bridge the gap in climate change information management by providing comprehensive services that empower communities and drive positive environmental change. We envision a safer, cleaner, and more climate-resilient Iraq driven by national technical leadership.



Strategic Sectors of Intervention

Climate Action & SLCP Mitigation: We support Iraq's Nationally Determined Contributions by actively monitoring Short-Lived Climate Pollutants, specifically methane and black carbon from unmanaged waste. We also produce long-term spatial analyses, including tracking Black Carbon trends from 2000 to 2024.

Mine Action & Environmental Integration: We pioneer "Green Demining" approaches that carefully manage vegetation and minimize environmental disturbance. Furthermore, we conduct comprehensive soil quality and land suitability analyses to ensure that all post-clearance land is safe for sustainable agricultural reuse.

Information Management & GIS: We significantly strengthen institutional decision-making by utilizing advanced geographical software to conduct comprehensive spatial risk mapping. This essential work involves producing detailed technical maps focused on regional land surface temperatures and their expanding urbanization impacts.

Monitoring & Evaluation: We routinely conduct comprehensive third-party monitoring and oversight, executing detailed field visits for rigorous process monitoring. We continuously evaluate overall program performance and develop internal capacities to guarantee highly transparent, accountable, and effective project outcomes.

Our Scale & Direct Impact

We currently operate with a highly robust technical capacity consisting of exactly 32 dedicated staff members, specifically including nineteen male and thirteen female professionals.

We actively reached 4,866 direct beneficiaries across our inclusive programs. This diverse community reach comprises 54% male, 46% female, and notably features 62% youth participants.

Our extensive grassroots engagement successfully includes conducting 174 educational awareness sessions, planting 228 trees, and training 50 dedicated community ambassadors who initiate local environmental campaigns.

We are currently and actively deployed across four major governorates throughout the nation, specifically maintaining impactful operational presence within Erbil, Baghdad, Salah Al-Deen, and Basrah.
